Crown	14%	3 D.Diamond + \$3.5M	\$490,000
Royal Crown	15%	3 Crown + \$15M	\$2,250,000

DAILY STAKING REWARDS DISTRIBUTION

Staking is when you lock crypto assets for a set period of time to help support the operation of a blockchain. In return for staking your crypto, you earn more cryptocurrency.

- ▶ The higher the amount of time they stake, the higher the reward will be.
- ▶ Staking is necessary to build trust and a bigger liquidity pool.
- ▶ Staking can be performed in desired sets of time periods.

In VistaPay let's say you bought a starter package for \$95, so immediately on the dashboard user will see his total return according to the package, and the return should be in coins which company using... daily distribution will be sent to a user system-generated wallet from the total estimate...and the coins in user system wallet that is only withdrawable...if withdraw requirements meet.

BLOCKCHAIN CRYPTO CARD PAYMENT

Take control of your crypto in your hands.

Top-up card and use it anywhere in the world, do online shopping, buy crypto, sell crypto and directly withdraw crypto using your card from any ATM.

A crypto card is a form of payment that allows anyone who holds cryptocurrency to spend it without first having to convert it into fiat currency. Many crypto exchanges have partnered with companies like Visa, MasterCard, and Swipe to process these transactions. Such cards come in both debit and credit versions and offer a range of options and possible perks.

A crypto card works just like any payment card from a regular financial institution. You can use it for regular purchases, just like a bank-issued debit or credit card. Many of these are commonly accepted for payments wherever shoppers can use traditional payment methods.

VISTAPAY UPCOMING EXCHANGE

- VISTAPAY is on the brink of launching its highly anticipated exchange platform, poised to revolutionize the digital currency landscape. This upcoming exchange will provide users with a seamless and secure environment to trade a diverse range of cryptocurrencies.
- Whether you're a seasoned investor or new to the world of digital assets, VISTAPAY's exchange platform will offer intuitive features and robust tools to cater to your needs.

BACK GROUND OF EXCHANGE

Background

The proliferation of cryptocurrencies led to the establishment of numerous exchanges around the world, offering trading services for a wide variety of digital assets. These exchanges provide a platform for users to buy, sell, and trade cryptocurrencies, much like traditional stock exchanges facilitate trading of stocks and other financial instruments.

VISTAPAY UPCOMING GAMING PLATFORM

Prepare for an unparalleled gaming experience as VISTAPAY unveils its groundbreaking gaming platform, where a diverse array of thrilling games awaits, from timeless casino classics like blackjack and roulette to exhilarating wheelspin adventures, promising endless excitement and the chance to test your luck and skill, all from the comfort of your own home, so get ready to immerse yourself in a world of non-stop entertainment and anticipation.

This platform is designed to cater to the diverse gaming preferences of users, offering a wide range of games to suit every taste and skill level. At the heart of VISTAPAY's gaming platform are classic casino games that have been beloved by players for generations. From blackjack to poker, roulette to baccarat, players can enjoy the thrill of these timeless games in a virtual environment that captures all the excitement of a real-world casino. In addition to traditional casino offerings, VISTAPAY's platform will feature a variety of other games designed to entertain and engage players. One highlight is the wheelspin game, which adds an element of chance and anticipation as players spin the wheel for the chance to win big prizes.

METaverse

A 3D virtual Universe space where humans experience life in ways they could not in the physical world.

Hold yourself to experience the greatest 3D metaverse by VistaPay.

Crypto metaverses are immersive virtual worlds with immense social and financial potential. Their use of blockchain infrastructure enables them to tap into the wider crypto economy, making virtual items exchangeable for real economic value beyond the confines of the metaverse. By incorporating the immersive environments of virtual reality (VR), the engaging playability of video games, the networked interactivity of social media, and the value exchange of crypto, metaverses are aligned to become a central element in the next phase of blockchain games on the internet.

VistaPay leverages the world's most advanced emerging technologies (VR/AR/AI) and the increasingly rapid adoption of mixed-reality technology to create a unique offering inside one single digital space where, through partnerships and collaborations with industry leaders, users are given the chance to enter an experience without parallel and rethink how they interact with each other and enjoy art.

ABOUT NFT

Non-Fungible Tokens (NFTs) further widen the applications and use cases of blockchain. By utilizing NFTs, both digital and physical items can be assigned ownership on the blockchain as well as any additional metadata. This capability can make many processes more efficient and remove the need for a “middle-person,” an example of this is transferring the rights to a digital asset without the need for an intermediate party or 3rd party escrow system. It also ensures that ownership cannot be tampered with and no longer has a central point of failure. Several NFT collections have been created and deployed, these NFTs are often collected, traded, and staked. An issue often seen with current NFT collections is the underlying infrastructure, most NFT collections are stored in a centralized server, for example, on a cloud server. NFTs are also simple to forge into perfect fraudulent replicas and sold on an open market at discounted prices before any unsuspecting consumer would notice.

ABOUT NFT

While ownership of these assets is recorded on the blockchain, the underlying digital asset (NFT) can be edited in the back end, therefore editing the supposedly immutable asset that the user purchased. Our solution can ensure that NFT collections, with added security protocols and authentication, cannot be tampered with in the Interplanetary File System (IPFS). IPFS is a distributed framework for storing files across a cluster of nodes. Every item added to IPFS is encoded and marked, this ensures that if any malicious node attempts to edit the file, the encoded hash would not match and hence the wider network would reject this file. IPFS operates similarly in similar fashion to the blockchain and is an ideal method to store NFTs where ownership is stored on the blockchain. NFTECH stores all generated NFTs on IPFS to guarantee the availability of the NFTs as well as to provide absolute assurance and extra immutability that no NFTs possess today.

SUMMARY (NFT'S)

- 2021 was the breakthrough - NFT transactions tripled, reaching more than \$338.04 million.
- Today's entertainment, game, art, and Finance industries are buzzing about NFTs. This includes musicians earning millions of dollars through releasing their own NFTs, to professional athletes launching their own NFT companies and gaming clubs looking for opportunities to mint their own NFT tokens.

The market cap of NFT shows a fast-moving development, growing nearly ten-fold between 2018 and 2021. NFTs have rapidly gained popularity among gamers, artists, celebrities, and influencers as a way to digitize their brands or IP rights. Any fan, no matter if they admire a music band, a football team, or Harry Potter books, loves to collect merch and memorabilia, and won't miss the chance to get to a Meet & Greet, a concert, or a match (as soon as the pandemic is over). Thus, it's only natural that dedicated fans and collectors are so into NFTs. The new way of collection and fan experience.
